WELLNESS TIP OF THE WEEK
Brought to you by HealthSource of Wicker Park
The world's most prominent researcher and writer about gratitude, Robert Emmons, defines gratitude as "a felt sense of wonder, thankfulness, and appreciation for life." There will always be times when it is very difficult to be grateful for things in your life but it is important to remember that things can always be worse. Having the ability to quickly return to a state of gratitude has been shown to have a variety of health benefits. Studies have shown that routinely expressing gratitude increases a person’s happiness, feelings of less aches and pains, decreases depression and helps you sleep better. These are all great reasons to start a daily habit of practicing gratitude.
